Washington, DC 20554

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable. We already pay a very high price for our phone with MANY taxes added on that we do not even understand. Why would you switch more taxes to us when the majority of us are on fixed incomes?

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. We make very few long distance calls and we do not want to pay for people who make many calls, especially big business. That seems to be all our government is about lately, helping BIG BUSINESSES OUT. What about us little people who have kept this nation going for years and years. This is so unfair, but here lately everything you've done has been unfair to the middle class (we're poverty level!!)

We use our wireless phone for SAFETY AND SECURITY we do not visit on it unlike most of the upper class who drive along with a phone to their ear and not paying attention to the road. We don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee. For once do what's right for the seniors.

Keep the USF Fair!

Sincerely,

Nancy Shipley
